

Process Control for Bulk Handling Industries

PRODUCT OVERVIEW

Process control for bulk handling industries

Product Overview

Flow Controller FC3

- Gravimetric dosage of free flowing bulk solids
- Continuous, parallel creation of product blendings
- Stepless controlled flat gate with weighing sensor
- Easy integration due to very low installation heights

Batch Controller BC3

- Dosage of batch amounts for truck loading applications
- Pneumatic controlled flat gate with weighing sensor
- Easy installation directly under silos

Vertical Pipe Weigher DCG

- Continuous weighing of free flowing bulk solids
- Reliable system with low maintenance
- Easy installation with standard pipe connectors

Rotor Weigher RC

- Continuous weighing of poor flowing bulk solids
- Low installation height, easy installation
- Largely insensitive to vibrations
- Patented and proven measuring system

Automatic Dampening System NC6

- Exact moisture regulation of all kinds of cereals
- Exact water dosage dependent on target moisture
- Successfully operating in more than 700 mills worldwide
